

TEJAL JOSHI

Data Scientist/Data Analyst

CONTACTS

- 7535853220
- tejaljoshi1212@gmail.com
- Ramnagar, Uttarakhand
- linkedin.com/in/tejal-joshi-137b2b391

SKILLS

Technical Skills

- Programming & Core Stack:** Python, SQL
- Data Analytics Libraries:** Pandas, NumPy
- Data Visualization:** Seaborn, Matplotlib
- Methodologies:** Exploratory Data Analysis (EDA), Data Cleaning, Anomaly & Outlier Detection, Feature Scaling (Logarithmic Transformations), Multivariate Analysis
- Tools & Version Control:** GitHub, Git, AI Optimization Tools

Developer Tools

- Jupyter Notebook, GitHub, Git, VS Code, AI Optimization Tools

Languages

Language (e.g., English) -
Language (e.g., Hindi) - Fluent

PROFILE

- Professional Title:** Data Scientist & Researcher specializing in reverse-engineering institutional metadata and systemic risk profiling.
- Core Strengths:** Expert in resolving complex data gaps, advanced EDA pattern mining, logarithmic transformations, and leveraging AI tools using the Python stack.
- Unique Edge:** Combines a strategic Political Science background with technical problem-solving to bridge qualitative frameworks with quantitative data pipelines.
- Value & Goal:** Collaborative team leader driven to deliver high-impact, scannable data intelligence and structural risk models for analytical teams.

EDUCATION

Masters in Political Science Kumaun University • India

- Education:** Masters of Arts (B.A.) in Political Science.
- The Tech Transition:** Transitioning from a non-tech background, I built my skills in Python, Pandas, and SQL out of a genuine interest in data analysis. I enjoy solving data puzzles, uncovering clean EDA patterns, and finding logical ways to fix data gaps in raw datasets.
- Core Academic Strength:** My political science background trained me to research thoroughly and think critically. I apply this same investigative mindset to analyze datasets, look beyond just the numbers, and help teams turn messy data into clear insights.

Higher Secondary (12th) GOVT.INTER College • Ramnagar Uttarakhand

- Higher Secondary Education :** Completed in PCM (Physics, Chemistry, Mathematics) stream.
- Leadership & Sports:** Actively participated in competitive sports, which built my core teamwork skills, discipline, and natural leadership qualities under pressure.
- Analytical Edge:** The combination of a strong mathematical background in school and extensive research training in college helps me grasp data concepts logically and structured.

Projects

Key Projects

- Nasdaq Analytics:** Cleaned 8,049 listings using Python/SQL to fill critical gaps and isolate compliance risks.
- Strait of Hormuz Research:** Conducted multivariate analysis mapping geopolitical impacts on global oil prices.
- Used Car Price Prediction:** Built an anomaly detection pipeline to fix dataset errors and predict valuations.
- Weather History Trends:** Performed statistical time-series analysis to model seasonal climate shifts.
